

**KMCO INC Update
Crosby, Texas
NRC # 1241683**

April 4, 2019

- The KMCO facility was shutdown following the explosion and fire on April 2, 2019. The facility remains shutdown.
- The Harris County Fire Marshall's Office (FMO) states they are complete with the fire investigation and will be turning the facility back to KMCO for cleanup operations on April 5, 2018.
- The FMO requested EPA conduct one more night of community air monitoring, in addition to the KMCO contractor air monitoring, until operations transfer to cleanup activities on April 5, 2019.
- The EPA and KMCO contractor continue community air monitoring activities on a 24-hour basis. Both contractors detected minimal concentrations of VOCs (0.1 ppm) in front of the facility on April 4, 2018, which was due to the removal of the foam blanket for FMO investigative activities. No readings were detected in other off-site areas.
- KMCO plans to maintain a fire fighting company on-site through the initial stages of product cleanup.
- KMCO continues to remove firefighting runoff water along the drainage ditch (West of the intersection of Crosby Dayton Rd / Ramsey Rd - North side of Crosby Dayton). Rainfall is expected Saturday, April 6, 2019.
